// core skills

Languages

Kotlin, Java, Coroutines, Flow

UI

Jetpack Compose, Material Design, Atomic Design Systems, XML-to-Compose migration

Architecture

Clean Architecture, MVI, MVVM, Multi-module, SDK / Platform engineering

DI & Data

Hilt, Dagger 2, Koin, Room, Retrofit, OkHttp

Media & Billing

Media3 / ExoPlayer, Google Cast, RevenueCat, Play Billing

DevOps & CI/CD

GitHub Actions, Bitrise, Jenkins, Gradle, Firebase, Datadog

Quality

JUnit, Mockito, Robolectric, Espresso, Detekt, Ktlint, LeakCanary

Multiplatform

Kotlin Multiplatform (KMP/KMM), Compose Multiplatform, Ktor, SQLDelight

AI-assisted engineering

Claude, Claude Code, AI-augmented code review, prompt-driven tooling

Gabriel TEKOMBO

Senior Android Engineer

// I turn ideas and average apps into outstanding Android products.

01 / summary

Senior Android Engineer with **8+ years** shipping mobile products at scale for BlaBlaCar, the World Health Organization, Pictet and Welltech. Specialized in Kotlin, Jetpack Compose and Clean Architecture; track record of modernizing legacy codebases, building platform SDKs, and delivering consumer apps totaling **100M+ combined downloads**. Founder of Nativia Solutions, publisher of ElectronIPTV, live on Google Play with paying customers.

02 / experience

• Senior Android Engineer, Mobile App Platform - Welltech

Full remote · 02/2026 - Present

- Build platform SDKs, shared libraries and tooling powering WalkFit, Yoga-Go and Muscle Booster, used by millions worldwide.
- Drive modularization and scalable architecture (Clean Architecture, MVVM/MVI) across multiple Android apps.
- Build and optimize CI/CD pipelines and developer tooling; Datadog dashboards for multi-brand mobile repositories.

Kotlin Compose Multi-module CI/CD Datadog

• Founder & Android Engineer - Nativia Solutions

Douala, Cameroon · 01/2026 - Present

- Designed, built and shipped ElectronIPTV, a live-TV and VOD player, on Google Play with paying customers: batched M3U parsing without OOM on low-end devices, RevenueCat monetization, Google Cast.
- Run an app development studio delivering Android applications, mobile product design and landing pages for clients.
- Provide IT consulting and deliver training programs on emerging technologies and AI.

Compose Media3 RevenueCat Product Design Consulting Training

• Senior Android Engineer (Contract) - Pictet Technologies

Remote, Luxembourg · 05/2025 - 11/2025

- Led the modernization of the Pictet Wealth private-banking app; replaced the legacy Backbase SDK with a maintainable, design-system-oriented architecture.
- Rebuilt the UI in Jetpack Compose on an atomic design system, eliminating XML layouts; Clean Architecture for testability.
- Delivered core banking modules (Onboarding, Portfolio, Payments, Transactions); reduced crashes, faster delivery.

• Android Engineer, Booking Squad · BlaBlaCar

Paris, France · 01/2024 - 06/2024

- Shipped booking features for a 100M+ member travel marketplace: Message As You Book, One Step Booking Flow, Share Driver Phone Number.
- Contributed to the Compose migration of the Pixar design system in a clean multi-module codebase (Coroutines, Flow).
- Enhanced debugging via a companion app exposing deep links and real-time API call inspection.

• Android Engineer · Pictarine

Toulouse, France · 09/2021 - 01/2024

- Developed the Walgreens, CVS and Walmart photo-printing apps: **1M+ downloads, 500K monthly actives, 99.97% crash-free.**
- Owned features across photo creation, editing and ordering; proposed UX improvements adopted in production.

Coroutines

LeakCanary

• Android Engineer · World Health Organization (WHO Academy)

Remote, Lyon, France · 08/2020 - 01/2021

- Migrated the WHO Academy app from Java to Kotlin, introducing Clean Architecture and MVVM.
- Built custom UI components; integrated an AR onboarding module (Unity SDK) teaching hygiene measures.

GitHub Actions

• Earlier Roles · Freelance · Variance Technologies · IUC

2017 - 2021

- Freelance Android Developer (2020–2021): apps for international clients, incl. MyCoolPay payments (Digital House International).
- Variance Technologies (2019–2020): led a white-label mobile banking app from scratch; MVP architecture, fully testable codebase.
- Institut Universitaire de la Côte (2017–2019): MyIUC campus app on the Play Store; enterprise biometric-enrollment app.
